**EXPLORE
A WORLD
of Colors**

There can be colour variation in material from different batches. It is advised to use same batch material to avoid colour variations. Actual colour of the laminate sheet may vary from this brochure.

ABOUT US

Authenticity, sustainability and empowerment lie at the core of everything we do at Arihant acrylic a well know name in acrylic products since its inception in 2004, Mumbai. From our dream of making the best of acrylic products accessible to all our valuable customers, Arihant acrylic has become the largest omnichannel designer acrylic importer, wholesaler & retailer. We will never compromise on the quality of the product we bring to you and the authenticity will always remain one of our key guiding principle.

We would also like to acknowledge you to our brand BRAVIO, importer in WPC panel's, Alabaster, Acrylic, Acrylic high matte laminates, PETG sheets, PVC wall and ceiling panels.

We work with Harmony and catena with all the distributors and retailers We strive to set a benchmark of designer and genuine product for both interior space as well as commercial, we place emphasis on wall paneling, highlighting cafeteria, kitchen space and every bit and corner to enlighten your comfort space We specialise in having our own fabrication and machinery serving you the superior quality work and luxurious designs. We have a team of professional associates who strive endlessly to provide the best shopping experience to each of our customers.

COLLECTION

AVAILABLE IN SIZE : 2440mm x 1220mm (8"x4") Thickness : 1.5mm/ 2mm

APPLICATIONS (KITCHEN) : Worktops, Table, Door, Shelves, Cabinets, Trolleys, Bathroom

FURNITURE (HEALTHCARE) : Wall Lining & Horizontal Surfaces, Lockers, Cabinets, Trolleys

COMMERCIAL : Hospitality & Restaurant, Table Counter Tops, Doors, Cubicles, Lockers Cabinets Wall Cladding & Partition

GENERAL USE & CARE GUIDE

ELROY laminates are manufactured with aesthetics and durability in mind. When used as recommended and with appropriate care, our laminates will last through the years. ELROY laminates are easy to maintain.

LAMINATES

- Cleaning Should be done with water and a clean, non-abrasive cloth.
- To remove more stubborn stains, use mild household cleansers like Colin IP gently wipe downwith a non-abrasive cloth.
- Avoid the use of abrasive liquid clensers, bleaching compounds or solution as these may damage the surface of the laminate.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30°C degree Celsius may cause damage to the laminate surface.
- Do not use the laminate for purposes that it is not intended for (E.g. do not iron, chop, hammer or expose the laminate to open flame.)
- Outdoor application of the laminate with exposure to direct sunlight an weather conditionsare not recommended.
- UV rays may deshape the laminate.
- Gloss surfaces are recommended only for vertical application.
- Do not use thinner and toluene on the surface of the Elroy laminates.
- This may causedecourization of the surface.
- Store the laminates at temperature below 30°C degrees celsuis.
- Typically confirm to internationally recognize technical standards.
- Have a thickness balance of +/- 10%
- Peel off the protective film after processing.

THE WAYS YOU CAN ENJOY THE ROYALNESS OF ELROY LAMINATETHE WAYS YOU CAN ENJOY THE ROYALNESS OF ELROY LAMINATE TO MAKE YOURDREAMS ALIVE IN SMART WAY.

To avoid avoid the problems of air bubbles appearing up and yellow color dullness or yellow patches problem in the laminate sheet after installation of ELROY laminate, customer should know some facts before buying ELROY laminate. As ELROY Laminate is 6H Acrylic laminate which have the scratch resistance characteristic and look like painted glass or colour lamination.

Please follow some facts about installation of ELROY Laminate.

- Please check the laminate at the time of delivery; also, please check whether it was not damaged during transport or handling, and then use it for installation.
- Before installing ELROY laminate make sure that sustrate (Plywood, MDF, Particle board) is good and superior quality of calibrated thickness and even surface.
- If there is uage of any interior quality or not as per standard quality dipped plywood and dipped lipping patti, kindly crub dipped colour layer by using sand paper. Then use ELROY laminate to avoid yellow colour patches.
- Clean the surface of substrate (Plywood, MDF, Particle Board) to make free from dust to grease by cloth, soft brush, sponge or sand paper.
- Always us water base Peva (Polyethylene Vinl-Acetate Co-Polymer) Adhesive like BRAVIO BOND for ELROY laminate.
- Stir the adhesive before using it. And do not mix water in adesive.
- Spread the adhesive uniformly brush, roller or adhesive spreader on both ELROY laminate and substrate (Plywood, MDF, Particle Board)
- Please do not use ELROY Laminate more then 8 x 2. Also leave atleast 2mm of groove between two pieces of laminate, so that at the time of pressing it will be easy for removing air between ELROY laminate and substrate (Plywood, MDF, Particle Board)
- Please do not use any uneven surface of substrate (Plywood, MDF, Particle Board) because in future it would affect the ELROY Laminate in its looks and finishing and will also lead to appearing of air bubbles in future.
- Use soft pinch roller or normal pressing technique at the time of pressing ELROY laminate on the substrate (Plywood, MDF, Particle Board). Also, the pressing should be done from the middle of the pannel and movie towards the side line and corners of the pannel. This will help in removing the air between the ELROY laminate and substrate (Plywood, MDF, Particle Board)
- Please make sure that you give suffient time to press the ELROY laminate for almost 12 to 15 hours to achieve full bonding strength.
- Please do not use synthetice rubber adhesive (SR, Jat, Bostic, Heatxetc)
- After the installation of ELROY laminate please avoid direct sunlight on it.
- Please do not place hot crockery directly on the ELROY laminate. Prolonged exposure to temperature above 30° C may cause patches to ELROY laminate.

HE FOLLOWING ARE THE REASONS WHICH LEADS TO AIR BUBBLES:

- Bonding of Acrylic/ PVC Laminate under Humidity atmosphere.
- Using of water base syrthelcreasin adhesive or other than PEVA (Polythylene Vinyl Acetate Co-polymer) adhesive may also lead to air bubble after the installation of Acrylic/ PVC laminate.
- Many a times due to uncertain weather conditions, Substrate (Particle, MDF, Particle Board) absorbs moisture. After few days of installation Acrylic/ PVC laminate on substrate, substrate gradually loses moisture. That moisture is the result of the air bubble between Acrylic/ PVC laminate and substrate after installation.
- Using of uneven surface substrate (Plywood, MDF, Particle Board) leads to debond at particular area of ACRYLIC/ PVC laminate sheet and air bubble appear at that area after the installation.
- When more than 8 x 2 of ACRYLIC/ PVC laminate is used for panelling, will also lead to air bubbles after the installation.
- Lack of pressing and short period of pressing at the time of bonding period of Acrylic/ PVC, laminate also leads to air bubble of after installation of Acrylic/ PVC laminate.
- Elroy sheets should not be kept evenly straight. if the sheets are in roll form it should be kept straight for minimum 48 hours and then you can press the laminate on the surface for better results.

WHY DOES YELLOW PATCHES AND COLOUR FADE PROBLEM APPEARS AFTER THE INSTALLATION OF ACRYLIC/PVC LAMINATE?

The reason behind these problems are as follows:

- When Acrylic/ PVC laminates experiences to face the direct fall of sunlight on it which leads to discoloration, fading and yellowness on the laminate.
- Using of inferior quality or not as per standard quality dipped plywood and dipped lipping patti may lose the colour due to chemical reaction between adhesive at the time of bonding period and yellow patches appear after the installation.
- Using of synthetic rubber adhesive (SR/ Jat, Bostic, Heatx) leads to brown or occur colour patches on Acrylic/ PVC laminates.
- Prolonged exposure temperature above 30° 0 cor placing hot cookware directly on the Acrylic/ PVC laminate surface.

There can be colour variation in material from different batches. It is advised to use same batch material to avoid colour variations. Actual colour of the laminate sheet may vary from this brochure.

Test Item: Light Ageing Test-UV Exposure
Sample Description: Plastic board
Test Method: ISO 4892-3:2016 Cycle 1 & ISO 105-A02:1993/Cor.2:2005
Test Condition:
Exposure cycle:
ISO 4892-3:2016 cycle 1
Lamp type: UVA-340
8h UV at (60±3) °C BPT, 0.76W/(m²·nm) @340nm
4h condensation at (50±3) °C BPT
Exposure duration: 200h

Test Result:

Test Item	Exposure duration	Grey scale
Light Ageing Test-UV Exposure	120h	4-5
	200h	4-5

Note:
1. According to ISO 105-A02:1993/Cor.2:2005, the grey scale was determined under the D65 standard light, with scale 5 as the best and scale 1 as the worst.
2. The protected film was ripped off before test.
